Explanation of expired/ruined doses (F) and gain/lost (I). \_\_\_\_\_

This is to certify that this report is a true accounting of the above biologicals received from the Texas Department of State Health Services that were administered during the reported time period.

Signature of local health authority or person responsible for vaccine administration. \_\_\_\_\_

Date \_\_\_\_\_

## Instructions:

This report should be completed each month by every organization that receives state-supplied vaccine. Retain a copy for three (3) years. Submit to your local or regional health department each month. Please do not include doses purchased with private funds.

Column A: Starting inventory. Must match column H from previous month's C-33 report

Column B: Enter total doses of each vaccine received as shown on Biological order form C-68. Add these to the starting inventory.

Column C: State-supplied vaccine transferred from other providers. Do not include wasted or expired vaccine. Add to inventory.

Column D: Subtotal. Add column A + B + C.

Column E: Enter doses administered during month by birth through 18 years and 19 years and older in the appropriate column.

Column F: Expired or ruined doses returned to the distributor. Please give an explanation of all returned vaccines in the space above. Subtract from inventory.

Column G: Doses transferred out of your inventory to other providers. Do not include expired, ruined or wasted vaccine in this count. Subtract from inventory.

Column H: This is the physical count of each dose of the biological. This is the ending inventory for this month and will be the starting inventory for next month.

Column I: Net Doses = D - (E + F + G + H). Enter net doses lost or gained. If ending inventory (E + F + G + H) is larger than D, you have a gain (+). If it is less than D, you have a loss (-). Please explain all losses and gains in space above.
